Are you one of those people who, when someone tells you they've seen a UFO, think that they must be one can short of a six pack? Do you still believe there has been no proof in all these years as to their existence? If so, then think again! One summer's day, Reg Presley, whose band The Troggs shot to fame in the sixties with unforgettable songs such as 'Wild Thing' and 'Love Is All Around Us' walked into a crop formation that changed his life forever. Through remarkable meetings with crop circle and UFO investigators, eyewitnesses, military personnel, scientists, astronomers and astronauts, among others, Reg was to discover a world behind anything he had ever experienced - a world of strange patterns in corn fields, inexplicable craft shooting through our skies, alien abduction, historical anomalies, suppressed information, establishment denial and disinformation. Never one to resist a puzzle, Reg has spent the past twelve years researching this phenomena. No stone has been left unturned, no dark corner left unexplored.
