

Professor Mommy Finding Work Family Balance In Academia By Kristen Ghodsee

"Pressestimmen Don't believe the myths--you can conquer the academy while raising children. It isn't easy, but few worthwhile things in life are. Connelly and Ghodsee show, step by step, how smart women win at work and win at home by protecting their time and focusing on what matters most (hint: it's not grading papers or ironing shirts!).--Laura Vanderkam, author of 168 Hours: You Have More Time Than You Think Do read this 'can do book for mothers who want to pursue an academic career! Yes, you can succeed and this book guides you through every step and pitfall--from choosing the type of institution that is for you to coming up for full professor. It doesn't shy away from the very real obstacles, like exhaustion during the early child-raising years, but offers alternative strategies for climbing the ladder. The sound advice is aimed at mothers--but it could be the handbook for any Ph.D. who is deciding on an academic career. I will recommend it to all my graduate students.--Mary Ann Mason, professor and co-director of the Center, Economics & Family Security at the University of California, Berkeley, School of Law; aRachel Connelly and Kristen Ghodsee have written a book that is not just a must-read for anyone contemplating the intricate and as-yet imperfect balance of academic life and family life, but for anyone at all interested in promoting equity in the workplace and more importantly, in the world of ideas. Professor Mommy lays out in stark detail the dismal record and very real statistics of the 'maternal wall,' 'glass ceiling' and the steep personal costs that women academics often face. But rather than stop there, they offer detailed, practical and user-friendly guidance on how to set your own priorities, draw boundaries and forge a path through this thorny obstacle course. They show it is not easy, but it is indeed possible to be both a successful academic and a loving parent with a rich family life. More, Professor Mommy is a call to action: that lasting change and that longed-for balance will come only when men become aware of the stacked deck against women and when women academics make the hard decision not to opt out, but to opt in, writing, publishing, thinking, promoting their ideas, and by their very presence, change the calcified system from within.--Brigid Schulte, Washington Post; Pulitzer Prize co-winnerProfessor Mommy is a well-researched, yet anecdotal account of parenting across disciplines relevant to all family forms in academia. It's one-of-a-kind, doesn't present 'defeatist' statements of sacrifice, but provides real strategies and

Professor Mommy Finding Work Family Balance In Academia By
support for anyone in their child-bearing years
attempting to navigate this challenging yet
rewarding period in life.--Tiffany Jenson,
Brigham Young University-IdahoBowdoin faculty
members Connelly and Ghodsee are mothers who've
struggled with the challenges of research,
teaching, publishing, and caring for children
in defiance of the conventional wisdom that
women in academia have to choose between family
and career. They devote an entire chapter to
debunking the myths that discourage many women
from pursuing tenure during their most fertile
reproductive years. Drawing on their
experiences and on surveys of and interviews
with a variety of women in academia, they first
review the decision to have an academic career
and the decision to have children, including
how many and when to have them. They proceed
with a detailed chronology of the tenure track,
a comprehensive guide, and unwavering
encouragement. They are frank about sacrifices
and challenges encountered during graduate
study and the PhD dissertation, and they detail
the hurdles presented by low salaries,
undesirable work locations, and long working
hours. But they also note the rewards of both
academic life and motherhood. Women interested
in careers in academia should appreciate this
helpful, encouraging resource.--BooklistIn
Professor Mommy, Rachel Connelly and Kristen
Ghodsee present a thorough set of questions for
women to consider and strategies to utilize in
order to make informed decisions about pursuing
both an academic career and family life. ...
Professor Mommy is a practical guide written
for women who are considering or currently
combining family life and the pursuit of
tenure. The authors recognize that tenure-track
fathers have challenges when they are involved
parents of small children, but Connelly and
Ghodsee intentionally speak to the particular
concerns and situations that mothers face. ...
Professor Mommy has many helpful insider tips
for any junior faculty member or graduate
student who has not had these conversations
with a trusted (mommy) mentor. ...[F]or those
of us who desire to seek tenure within the
existing system, having access to the
information in Professor Mommy is invaluable.
The book does what it sets out to do, providing
information and options for women to make
decisions that will position them as best as
possible for tenure and promotion within the
existing system. Recognizing that the
assimilationist approach will not work for
every woman, it provides guidance for the
many.--Feminist Collections: A Quarterly Of
Women's Studies Resources Æber den Autor und
