

# **Teaching In Nursing And Role Of The Educator The Complete Guide To Best Practice In Teaching Evaluation And Curriculum Development By Marilyn H Oermann Jennie C De Gagne Beth Cusatis Phillips**

"Críticas "This second edition is a comprehensive and practical resource for anyone who is already a teacher of nursing and for those looking to take on an educator role in the future. Every aspect of education is effectively covered. There are many resources, references, activities, and templates presented in addition to four new chapters as well as the online features. Very worthwhile!"--Doody's Medical Reviews Reseña del editor With essential, updated content for novice and experienced nurse educators. This evidence-based text delivers the full scope of knowledge necessary for novice and experienced faculty to become competent teachers in nursing. The only book to focus on the full academic role, it encompasses all of the key concepts required for effective teaching, curriculum development, evaluation and testing, becoming a scholar in nursing education, and much more. The second edition is updated throughout and includes four new chapters on Understanding the Learner, Interprofessional Education, Curriculum Models, and Global Nursing Education. It offers new content on role of the nurse educator, learning theories, active learning, flipped class/team-based learning, teaching strategies, teaching in an online nursing course, using new technologies and simulation, clinical teaching and evaluation, test construction, scholarship of teaching, and more. Chapters begin with objectives and conclude with a content summary. Each chapter integrates research and evidence into the text and includes specific examples of the methods and strategies presented, and 'How-to Tips' for readers. Also available with the book is an online course with sample course syllabus, modules for each chapter, learner activities, discussion forum questions, and Power Point slides. New to the Second Edition: Four new chapters: Understanding the Learner, Interprofessional Education, Curriculum Models, and Global Nursing Education Learning concepts important in teaching Active learning strategies, flipped class/team-based learning Teaching in online nursing courses and programs New technologies and what's new in simulation Innovative models of clinical teaching Assessment, evaluation, and test construction Curriculum development and evaluation Scholarship of teaching and becoming a scholar in nursing education Developing partnerships with clinical settings New ancillary with complete online course of 20 modules Key

Teaching In Nursing And Role Of The Educator The Complete Guide To Best Practice In Teaching Evaluation And Curriculum Development By Marilyn H
