to recognize and contrast them instantly, then keep reading. Dark Psychology can be seen as the study of the human condition, in relation to the psychological nature of the different kinds of people who prey on others. Due to social norms, the human conscience, and other factors, most humans tend to restrain their dark urges and to keep themselves from acting on every impulse that they have. However, there is a small percentage of the population that is unable to keep their dark instincts in check, and they harm others in seemingly unimaginable ways. Dark Psychology is becoming more and more used by those who want to control your actions, to get what they want. All in all, it is quite clear that the knowledge of this subject is necessary for
