Le génie torturé d'un maître du post-impersonnisme Aujourd'hui, les oeuvres de **Vincent van Gogh** (1853-1890) sont parmi les plus connues et les plus célébrées dans le monde. *Les Tournesols*, *La Nuit étoilée* ou *l'Autoportrait à l'oreille bandée*, parmi tant d'autres de ses peintures et dessins, laissent transparaître **la dextérité unique de l'artiste à représenter les ambiances et les lieux par la peinture, le crayon, le fusain ou le pastel**. Pourtant, alors qu'il déployait les **couleurs vibrantes en touches expressives et les formes au contour délimité** qui allaient faire sa renommée, van Gogh luttait contre le désintéret de ses contemporains, mais aussi contre **ses crises de folie**. Ses épisodes de dépression et d'angoisse ont finalement eu raison de lui, puisqu'il se suicida en 1890, peu après son 37^e anniversaire. Cette introduction richement illustrée retrace la vie de Vincent van Gogh: ses premières oeuvres figurant paysans et ouvriers agricoles, sa lumineuse période parisienne et son dernier sursaut créatif, plein de frénésie, durant les deux dernières années de sa vie qu'il passa dans le Sud de la France..
